Welcome to Wikiversity

Set learning free

with 37,443 learning resources and growing.

Welcome

Wikiversity is a Wikimedia Foundation project for openly creating and sharing learning resources, collaborative learning projects, and research. It supports all levels and types of learning — from early childhood and school education to university study, professional development, and informal lifelong learning. Wikiversity is built by educators, students, researchers, and curious learners. Explore Wikiversity by taking a guided tour or jump in and learn how to add content and start editing. If you have any questions, join the main discussion in the Colloquium.

Today's Featured Project

Instructional Design

The instructional design camp is a set of course modules based around a core created by Peter Honebein and students of the Indiana University. Groups from other universities, as well as other researchers and experts, are welcome to add modules to this project. The goal of this learning experience is to develop the skills needed to design instructional material using media (especially communication technologies) to transfer knowledge as effectively as possible between teachers and learners. The project currently comprises about 130 pages included well-developed modules on crafting well-formed learning objectives, prioritizing content for learning experiences, designing constructivist learning experiences, designing instruction for cognitive behaviors, designing instruction for psychomotor behaviors, designing instruction for affective behaviors, designing instruction for interpersonal behaviors.
